

# “Study Of Secondary Cancers In Patients With Hereditary Retinoblastoma; Design Of A Strategy Based On Liquid Biopsy For An Early Diagnosis And Adequate Follow-Up (RET-LB Project)”

**OUR PROPOSAL:**

**NGS-based test in liquid biopsy for early detection**

# Open to collaborate/participate

- **In the retrospective part:**  
Share genomic data on secondary neoplasia  
Provide samples, either DNA or tissue
- **In the prospective part:**  
Share your experience in liquid biopsy  
Provide liquid biopsy samples  
Share your experience in liquid
- **In any other way you like**
- **We can offer:**  
Open to incorporate new teams into the project  
Open to share genomic data produced  
Provide genomic analysis of new samples
